# ASSIGNMENT-2
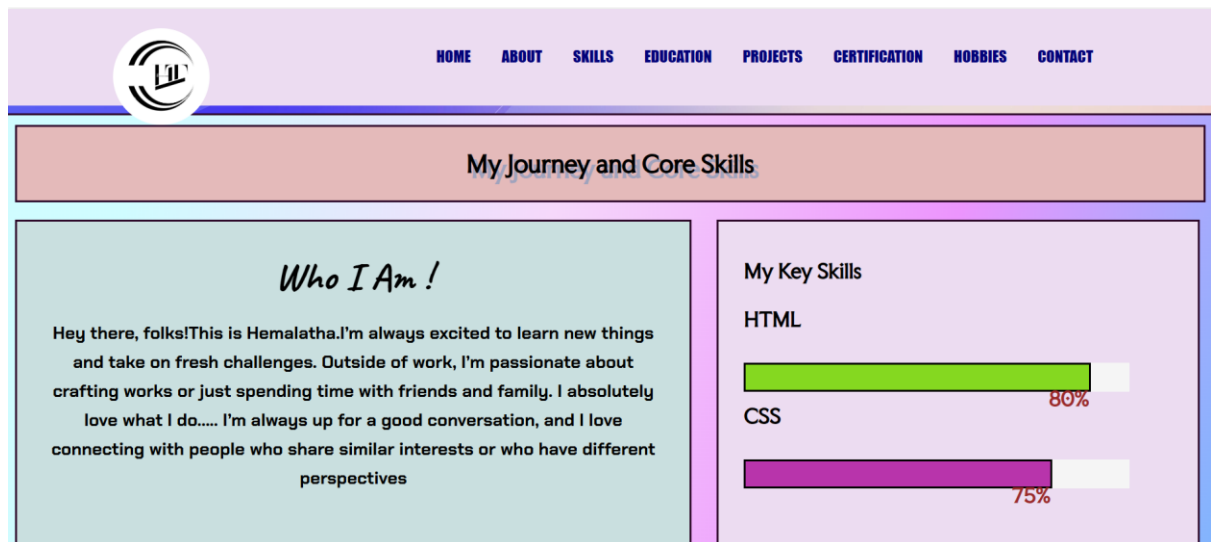

## MY SIMPLE PORTFOLIO WEBSITE

Short Intro to my assignment:

- I create simple portfolio website using HTML and CSS for managing my personal informations. I gave beautiful background image and color to my page.

- I include eight navbar. when you click on that topic it will redirect directly to that specific page .That will easier to find needed topic details . I gave attractive logo to my page "HT", means Full form of my name.

- I gave short intro to me and highlight of 'Future Full Stack Developer' in red color .In bottom of my page I gave two clickable buttons-'Download Resume' and 'Know More'.

- Download Resume-Redirect to download my resume.

- Next section-'My Journey and core skills'. This section will help to get my key skills and casual intro of myself .In this section ,I introduced new font-family which is downloaded from https://fonts.google.com/ and also I gave good looking background colors-which will get attention of viewers.

- I have mentioned Academic path in third section. I gave my schooling and gradution details .I gave red color to percentage when I hover it.In academic path section,I introduced transition property when I hover it using cursor.

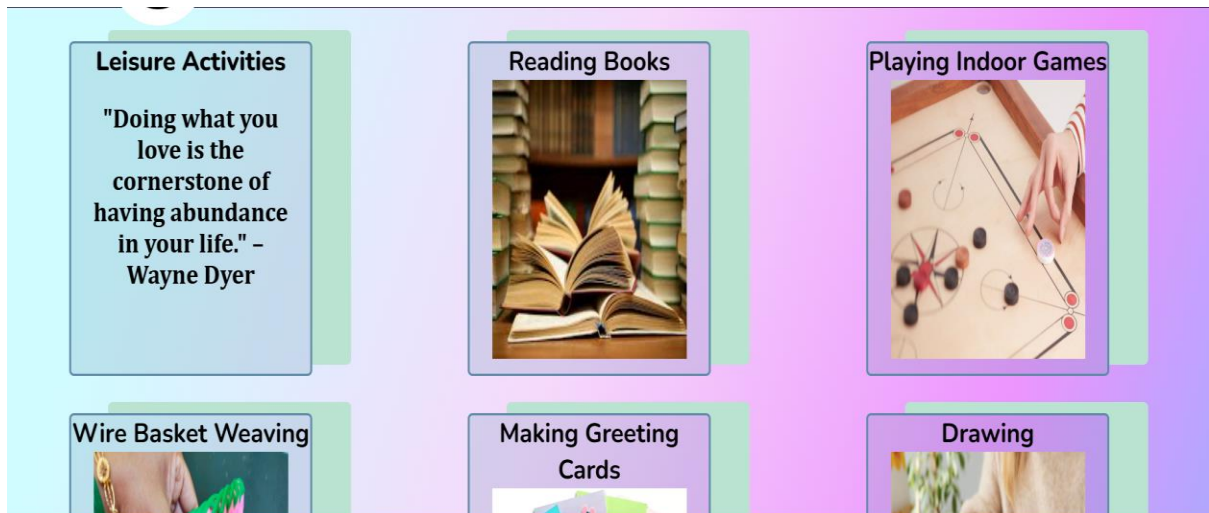

- The fourth section is 'Project works' which is display completed/ongoing project works in fullstack development. When I hover the box,I will show zoom in and zoom out effect.

- The next section is 'certification of completion' which is showcase my certificate orderly. When I click that box ,it will redirect to certificate pdf.
- We can see colour changes when you hover that box in a particular duration.

- In leisure activities section,you can see my hobbies and understand that how I used my free time effectively.when you hover that box it will turn 180 degree on X axis and also I gave box shadow to get more attention on viewers.

- Final to make contact with viewers/customer.This field used to interact with more people and we can get more knowledge and updates from experienced persons.

- In this field,I asked basic personal information like name,e-mail and comments.

- In footer ,I gave my mail-id and phone number which is help to reach me easily and ask quieries .To get more link I gave some icons to get touch with knowledgable indivituals.
